

TECNOGREEN / SINGLE-GLAZED PARTITION WALLS / PLUG-IN

What happens when two strong brands come together? They combine their qualities! TecnoSpace chose BuzziSkin and its acoustic qualities to clad a new wall panel. And TecnoGreen was already a fact: to create a sound bubble, or an attractive acoustic framework within a concentrated workplace. Lose that aquarium feeling and add some colour and spice to your working environment. TecnoGreen is an elegant and slim sandwich panel that can be used as a plug-in with TecnoSlim or TecnoPure Lite. Combined with the elegant glass wall, this fits seamlessly into the whole.
